Summary

Front-End Developer with 10+ years of experience building accessible, high-scale web platforms for regulated industries. Proven track record delivering 300+ production websites, creating reusable front-end systems, and improving team efficiency through tooling, documentation, and mentorship.

Experience

OMNICOMMANDER, Miramar Beach, FL

Lead Developer - Front-End & Accessibility

November 2017 - Present

- Led delivery of 350+ responsive, ADA-compliant websites, acting as primary developer on 200+ projects and overseeing team-built implementations through technical guidance, audits, and quality reviews, contributing to adoption across 10%+ of the U.S. credit union market.
- Built and standardized templated wireframes and reusable front-end systems, significantly reducing development timelines while maintaining accessibility and quality standards.
- Directed development of an internal QA Helper tool that identifies broken links and 20+ common ADA and QA issues, improving site quality before formal review.
- Oversaw the migration of 460+ client websites to GitHub, establishing naming conventions and repository standards to improve organization, version control, and scalability.
- Created and maintained a centralized Code & Image Asset Library and internal Intranet hub, streamlining debugging, training, and cross-team collaboration.
- Promoted to Lead Developer (Nov 2023), mentoring developers through weekly meetings and one-on-ones, conducting code reviews, and supporting technical growth and best practices.

Practice Management Institute – San Antonio, TX
Web/Email Marketing
2010 – 2016

Improved UX and accessibility-conscious design for online course enrollment and client dashboards while managing responsive email campaigns.

Concourse Team Express – San Antonio, TX
